

Bring #2 pencil, hi-lighter and calculator

1. Mean, median, mode, range, variance
2. Understanding the standard deviation curve
3. CAT scan are similar to _____ rays.
4. MRI scans are more precise than CAT scans
5. Which scan shows abnormalities the best? _____
6. Which scan is best for detecting bleeding in or on the brain?
7. Radiologist=
8. CONTRAST= chalky substance to be swallowed for a CAT/MRI scan
9. PET scan does what?
10. Stereoscope- largest working distance
11. ALGOR MORTIS
12. LIVOR MORTIS
13. RIGOR MORTIS
14. PALLOR MORTIS
15. Be able to calculate rigor and algor mortis
16. 37 degrees, 9.36 degrees, 0.78 degrees, 0.39 degrees
17. The only one that can give a time of death is the _____
18. Butyric acid is associated with decomposing flesh.
19. AFIS
20. CODIS
21. Modus Operandi
22. Corpus Delicti
23. Types of fingerprints (loop, whorl, arch)
24. FBI classification system of fingerprints is based on what pattern?
25. Plastic print=
26. Latent print=
27. Most common finger print=
28. Location and names of crime labs in USA
29. Darkness around a gunshot wound if from _____
30. Approximate number of crime labs in USA= _____,
31. Oldest crime lab?
32. The word ocular is associated with what body part?
33. Odontology= _____
34. Asphyxia=
35. Anaphylaxis=
36. Putrefaction=
37. Legs and feet are in rigor, TOD?
38. Head and neck in rigor, TOD?
39. No rigor present in warm body? TOD?
40. No rigor present in cool body? TOD?
41. Perjury
42. Mathew Orfila
43. Locard's Exchange Principle
44. Bertillion did what?

45. Embalming is what?
46. Significance of blowflies
47. Fingerprints are formed in what stage of life: _____
48. Approximate number of ridge characteristics on a complete fingerprint? _____
49. Postmortem vs antemortem
50. Duties of the first arriving officer of a crime scene?
51. Which of the internal organs cools the slowest? _____
52. Handwriting analysis (uncrossed t's, small writing, large writing, no regard for margins)
53. Celsius vs Fahrenheit freezing and boiling points
54. Anthropometry
55. Ligature strangulation
56. Quantico
57. APB
58. Extradition
59. Triage
60. Inadmissible evidence
61. Minutiae
62. Graphology
63. Vitreous humor and potassium levels
64. Ambient temperature
65. Cadaveric spasm
66. Time for peak rigor mortis
67. Body with temperature of 10 degrees Celsius has a TOD of _____
68. What must be present on a crime scene sketch?
69. * A Sketch does not include the suspects!
70. What type of bag should be used for bloody clothes? _____
71. *Charred remains (burnt remains) go into airtight glass jars.
72. Which of the following are death penalty states? Texas, New York, Michigan, Florida, Georgia, California
73. When should crime scene NOTES be taken?
74. Four types of crime scene procedure (_____, photos, _____, video)
75. Types of Crime Scene Searches:
 - a. Grid- double-line search, very time consuming
 - b. Line- used in large outdoor areas with many volunteers
 - c. Zone- requires more than one investigator (a state wide search)
 - d. Link- used in every case
76. Ink Jet Scam in California (Talton)
77. Bank notes are ____
78. What is active ingredient in counterfeit money pen?
79. Significance of blowflies
80. Intraocular fluid remains in eye for _____ days
81. Graphology- baseline is _____
82. Graphology- IR light and UV light
83. Types of questioned documents are: rare books, passports, _____
84. Graphotherapy
85. Rosinsky case 1997 states:
